Cybersecurity Tips
For Students At
Home And
In School

Students live much of their lives online, especially now with the transition to remote learning. Cybersecurity skills are a must. They need to understand how to safely navigate this digital world, taking advantage of its offerings while avoiding the dangers of its darker corners.

Effects of Cyberbullying on Children's Learning

Kids being victimized by cyberbullying may lose interest in school; they often have much higher rates of absenteeism than non-bullied kids. They skip school to avoid facing the kids bullying them or because they are and humiliated by the messages that were shared.

Their grades suffer, too, because they find it difficult to concentrate or study because of the anxiety and stress the bullying causes. Some cases, kids will either drop out of school or lose interest in continuing their education after high school due to cyberbullying

- Secure your social media.
- Use apps, tools, and websites that encrypt data.
- Use strong and unique passwords.
- Be vigilant regarding phishing scams.
- Know the terms and conditions.
- Don't share personal information.
- Update apps and device operating systems.
